

Find your next customer. Know what to say.

We score every UK residential address by buying intent — combining 12 licensed and public data sources into a single per-vertical score. No more cold lists. No more wasted door-knocks.

WHY TERVA

1 Per-address intent score

0–100 score for every UK address, tuned to your vertical — solar, heat pumps, insurance, broadband, windows, security, EV chargers and more.

2 12 sources, one signal

EPC, Land Registry, Planning, Companies House, Ofcom, BGS, Flood, Crime, Solar potential and more — fused, deduped, refreshed.

3 Compliant by design

UK GDPR legitimate interest. Address intelligence — not consumer profiles. Full LIA and DPIA on file.

HOW IT WORKS

01 Pick a territory

Choose postcodes, a radius or a drive-time area.

02 Get scored addresses

Receive a ranked list with the signals behind each score.

03 Convert

Reach out by post, door, call or LinkedIn with AI-written copy that cites the real signals.

BUILT FOR

30 verticals · Solar · Heat pumps · Insurance · Mortgages · Broadband · Windows · Security · EV chargers · +2

See your territory scored in 60 seconds.
